Third-Party Involvement and Your Controls

These tracking mechanisms may be implemented directly by us (**first-party**) or by external service providers like **Google Analytics** or **Meta (third-party)**. Because these external entities may have their own privacy frameworks, your prior interactions with their tools on other websites may govern how they process your data.

You have several methods to manage these technologies:

1. **Browser Adjustments:** You can modify your browser settings to restrict or block cookies.
2. **Manual Deletion:** Local and session storage—which we use for authentication, app settings, and cached data—can be cleared at any time by deleting your browser's history or cache.

Please be aware that your legal authority to change tracking or cookie configurations may be determined by the specific laws of your home jurisdiction or the location from which you access our Site.

We distribute Personal Information to third parties and marketing entities to facilitate our services. However, your Financial Data is strictly excluded from general disclosures; it is accessible only to essential operational partners (such as those handling billing, hosting, fulfillment, or data security) who are contractually bound to maintain our privacy standards. Structural Changes and Data Anonymization

- **Corporate Transitions:** Should the Company undergo a merger, divestiture, reorganization, or liquidation (including bankruptcy), your information may be transferred to the involved third parties as a business asset in compliance with applicable law.
- **De-identified Information:** We may aggregate or anonymize data so it is no longer linked to your identity. This non-personal information is used and shared without restriction for research, marketing, and other business purposes with affiliates and third parties.

Interest Based Ads

We may distribute your Personal Information to external marketing partners and third-party entities to facilitate tailored advertisements on platforms not affiliated with us.

If you lack this authorization, you are strictly prohibited from providing such data.
- **Economic Valuation of Personal Data:** These voluntary programs assist in our business growth.
